## Gemark adds Secure Destruction Specialist to Sales Force

Bluefield, WV: Gemark Corporation is pleased to introduce its newest team member, John Steller. John will be an addition to the national sales team in representing Gemark and its secure destruction services. He will work out of the Newburgh, NY plant.

John brings with him 25 years of experience in dealing with and securing business with large corporations, government agencies, and municipalities nationwide. Holding a Masters degree in Public Administration, and having such deep familiarity with how big entities work, John is a perfect fit for Gemark.

Gemark prides itself on its secure destruction program that has been designed from the ground up to offer the most secure and environmentally friendly way to destroy materials. Gemark is equipped to handle large volumes of sensitive medical, legal, and archived files, along with counterfeit and seized goods, quality control rejects, and precious metal bearing materials such as x-rays. The security measures used exceed the requirements of Fortune 500 companies and even the most demanding federal government agencies. Gemark's thermal reduction process creates its own energy and does not require the use of fossil fuels. Waste energy is also used in other plant processes.

Gemark has four plant locations in the United States. Gemark Corporation's mission is to provide the very best secure destruction services and returns on assets in a safe, secure, and environmentally friendly manner.
