

Full Logistical Services

Introduction

Gemark Land Service (GLS) was created in 1995 as a way to ensure reliable, safe and secure transportation of our customers' recycling, refining and precious metal materials.

Services

Our fleet serves Gemark's four strategically placed facilities around the United States (Las Vegas, NV; Newburgh, NY; Exeter, PA; and Bluefield, WV) and assures that you are never too far from Gemark and the services we provide.

GLS ensures our customers a reliable, safe, and secure form of transporting materials from your facilities to our processing plants throughout America. All of our company-owned trailers are equipped with the most sophisticated satellite tracking system in the transportation industry.

Our U.S. Department of Transportation certified drivers each average more than 15 years experience on the

road and GLS logs an average of more than 1.9 million safe miles a year.

GLS adheres to all state and federal regulations and our drivers utilize electronically-scanned logs so that we may further track the movement of goods.

Transportation "Chain of Custody"

- At pick-up, our clients seal the trailer containing the documents or other materials with their seal or our seal and the number is noted on the bill of lading.
- While in transit, Gemark trailers are tracked via GPS technology that permits real-time internet tracking of the trailer that is accessible by the customer.
- Upon delivery to our facilities, the seal is examined to confirm it is intact and the number verified. Except in the case of a Department of Transportation (DOT) verifiable inspection, in which case the DOT then places its own new seal. A broken or different seal will trigger an immediate investigation and notice to the client.

Emergency Procedures

Gemark partnered with Pinkerton Security to provide emergency planning, response and contingency services.

In the event a Gemark trailer is involved in an accident, breakdown or other compromising situation on one of our routes, Pinkerton dispatches guards and emergency response experts to secure the trailer in order to preserve the integrity and limit the loss of the loaded material.

To learn more about all of Gemark's security measures please request our "Statement of Commitment to Data Privacy and Security" document, which outlines in more detail all security measures.

Who We Are

Gemark Land Service provides a secure and safe way to transport materials.
